

Rakan Shaker

Software Engineer

Denver, CO

954-319-6735

hello@rakanshaker.com

Professional summary

Fullstack Software Engineer with 4+ years of experience building and scaling data-driven systems in AWS environments. Contributed to consolidating three production applications into a centralized multi-tenant metadata platform serving ~1,000 client instances among other data pipeline applications. Experienced in serverless architecture, PostgreSQL data modeling, and batch data processing, with the ability to deliver lightweight accessible React frontends.

Technical Skills

- **Languages:** TypeScript, Python, SQL
- **Backend:** REST APIs, Lambda Powertools, Serverless Architecture (AWS Lambda, API Gateway), Batch Processing
- **Databases:** PostgreSQL, Relational Data Modeling, Multi-Tenant Schema Design
- **Cloud & Infrastructure:** AWS, Docker, Cloud-Native Deployments
- **Frontend:** HTML5, CSS, Javascript, TypeScript, React, Material UI, Bootstrap
- **Other:** Accessibility (WCAG), CI/CD Practices

Professional Experience

Cobank – Senior Software Engineer

Mar 2026 - Present

- Played key role in designing API layer for large scale migration to AWS
- Coordinated across multiple teams to improve health monitoring for API layer

CareerPCS – Software Engineer (Freelance)

Nov 2025 – Mar 2026

- Joined as 4th engineer to develop revenue-generating features
- Implemented proprietary DOD data collection to maintain core features' relevance for clients
- Developed leaflet map feature to ensure visibility of relevant search data

EAB – Associate Software Engineer

Jul 2022 – Mar 2026

- Played a key role in consolidating three business-line-specific applications into a centralized Instance Metadata Manager (IMM) platform serving ~1,000 university client instances.
- Contributed to redesigning the PostgreSQL data model to preserve business-line delineation while enabling unified data access for downstream analytics teams.
- Implemented and maintained serverless backend services using AWS Lambda and API Gateway to support metadata management, campaign workflows, and contact storage.
- Developed batch processing jobs to handle large-scale data ingestion and transformation for internal data delivery.

- Served as Subject Matter Expert (SME) for 2–3 core systems, providing debugging support, feature development, and cross-team technical guidance.
- Managed AWS infrastructure resources in alignment with organizational cloud standards.
- Built lightweight React + TypeScript internal interfaces to support operational workflows.

EAB – Associate Frontend Engineer

Jul 2021 – Jul 2022

- Developed React + TypeScript applications integrated with backend APIs for marketing and data workflows.
- Collaborated with backend engineers to define API contracts and improve data reliability across systems.
- Implemented accessibility best practices across client-facing web applications.

Bandit – Software Engineering Intern

Dec 2020 – Jul 2021

- Contributed to full stack feature development across production systems.
- Resolved backend and frontend issues in collaboration with cross-functional stakeholders.

Prior Experience – Creative & Media Production

Senior VFX Designer – YouVisit/EAB

2018–2021

Led visual effects production for virtual reality experiences and collaborated with engineering teams on interactive media systems.

Cinematographer – YouVisit

2016–2018

Produced and managed large-scale 360° video content for university marketing campaigns.

Education

Florida State University, Tallahassee, FL

Bachelor's of Fine Arts in Motion Picture Production

May, 2008 - Dec, 2012

Graduated magna cum laude.

Software Engineering Mentorship Program, New York City

2019-2020

Completed a structured mentorship under the Director of Engineering and senior engineers (references available upon request), building real-world full stack applications with code reviews, architectural feedback, and hands-on backend and frontend development.
